“When I had nowhere else to turn and thought no one cared, AmeriCares was there. I could never afford my medications without them.” – Parker, patient

We Need Your Help

Donate

AmeriCares Free Clinics needs your financial support to keep our doors open. All donations are tax-deductible.

Volunteer

We are always looking for doctors – both primary care physicians and specialists – as well as nurses, nurse practitioners, emergency medical technicians and medical assistants. We also need eligibility screeners and interpreters who speak Spanish and Portuguese.

AmeriCares Free Clinics

Providing free, quality health care to the uninsured since 1994

The AmeriCares Free Clinics provide free, quality health care to low-income Connecticut residents without health insurance in a setting where all patients are treated with dignity and respect. Since 1994, we have provided over \$30 million worth of medical care to our neighbors in need. Patients receive comprehensive care including medications, lab work and diagnostic testing all at no cost. We are able to offer our services free of charge thanks to the generosity of countless volunteers, donors and community partners.

Helping Our Neighbors in Need

Our patients are the uninsured. Whether working or unemployed, they do not have access to public or private health insurance.

Without our clinics, many of our patients would rely on emergency rooms for primary care services, or worse, delay care until they have a medical emergency.

Partnerships Make it Possible

We provide more than \$4 million worth of quality, outpatient care annually thanks to the support of nearly 400 volunteers – doctors, nurses, interpreters and screeners. Local hospitals, laboratories and specialists also donate valuable services, enabling us to offer our patients comprehensive care. We rely on the generosity of individuals, corporations and foundations to cover program expenses.

“This is how I always wanted to practice medicine. I get to spend as much time with my patients as I need without worrying about insurance reimbursements. And the patients are so appreciative that it’s payment enough.”

– Dr. David Kaminsky, volunteer
